PRESS RELEASE

## GEN-I's new electricity price list for small business customers

GEN-I will change its regular price list for small business customers with effect from 1 January 2024. Despite challenging market conditions, GEN-I is actively managing to ensure competitive prices for small businesses and demonstrating its customer care mission. With the announcement of a new three-year product for the small business customer segment, GEN-I further demonstrates its commitment to innovative and environmentally friendly solutions.

**Ljubljana, 8 December 2023** – The new GEN-I prices for small business customers are EUR 0.15350/kWh for HT, EUR 0.13650/kWh for LT and EUR 0.14500/kWh for ST (prices excl. VAT) and EUR 0.18727/kWh for HT, EUR 0.16653/kWh for LT and EUR 0.17690/kWh for ST (prices incl. 22% VAT). Therefore, the bill of an average GEN-I small business customer will be 13% higher in the case of single tariff metering and 15% higher in the case of dual tariff metering from January 2024 onwards (i.e. with bills issued in February 2024).

In addition, GEN-I will also offer small business customers the possibility to enter into three-year electricity lease contracts at a guaranteed price lower than the new regular price list. This will give Slovenian small businesses a longer period of predictable electricity costs.

The new regular price list has been published at gen-i.si and all small business customers will be informed of the changes in writing in the coming days.
